

# Large Laser Engraving Machine

## Description:

- ❶ 100w laser tube can cut Acrylic of 20mm thickness in one step.
- ❷ Advanced controlling system can effectively engrave, cut, and drill, etc.
- ❸ Process files directly from CorelDraw & AutoCad.
- ❹ Adopt international advanced linear rail for X.Y axis, more precision.
- ❺ X,Y axis, configured with THK linear rail from Japan, ensuring more stable movement in high accuracy.
- ❻ Resolution: <0.025
- ❼ Setting Accuracy: 0.1mm
- ❽ Repetition Accuracy: <0.1mm
- ❾ Max. Cutting Speed: 30,000 mm/min
- ❿ Max. Engraving Speed: 2,500 mm/min

## Optional Configuration:

- Panasonic AC Servo Motor (S type only); for faster cutting, engraving and better finishing.
- Lift Platform
- High Power Chiller
- Rotary Device

Model	Working Size	Power
SL 6040/S	600x400mm	40-50w
SL 9060/S	900x600mm	60-70w
SL 1290/S	1200x900mm	80-100w
