

SIGNS AND PRINTING
ELECTRONIC & DIGITAL EQUIPMENT

Enhance advertising effects by branding with your identity

"SPEDE" LCD Digital Players are the future of POS & Indoor advertising. Very soon, these screens will be replacing all stands and light boxes. The attractive shape makes them a valuable piece of furniture and a must for every high end industry, like jewelry shops, brand clothing shops, Haute Couture, car show rooms, hotel lobbies, shopping malls, restaurants, pharmacies, airports, etc ...

The smooth Glass finish gives users the possibility of joining printed graphics to the screen to give a better visual impact to the target viewer.

The Players can also be equipped and supplied with wheels, in order to facilitate moving the signs easily whenever needed.

Input is done through either simple functions like Plug and play USB devices or through a network connection, wired or wireless. It can be operated by a remote control or a touch screen (Android Version)
